

Proper Chemical Storage

Instructions

Store chemicals below or away from all food.

- Store chemicals in a separate cabinet or under a sink.
- Store chemicals below food, never on a shelf above food or above any food preparation or food equipment area.
- All chemicals must be clearly labeled.
- Follow the directions on the label carefully.
- Only store chemicals necessary for operation of the food service establishment.
- Household pest control chemicals are not allowed in food establishments. Contact a licensed pest control company instead.
